# MONERO & bitcoin

For private and professionnal customers

A souvereign means of civic exchange

> This flyer can save your business

2025

## Why Bitcoin et Monero?

These are 2 independant, decentralized crypto-currencies. Bitcoin (BTC) is traceable, while monero is untraceable. For:

- Putting an end to abusive bank charges
- Obtain new customers
- Limit inflation and protect your cash flow
- Anticipate the end of cash: these are only 50€ bills left in ATMs...
- No more financing their wars with our money
- Countering the centralized digital euro(CBDC)...

#### We need a:

*p.1* 

- Legal tender, convertible into €
- Decentralized sovereign incensurable
- Quick, simple, collective

If possible untraceable

## Is the share price volatile?

YES, the price of these 2 crypto-currencies is volatile, but – and – so over time.

And on average, **bitcoin** has risen by 90 %/year in average for 10 years!

### It's virtual, not palpable?

Write down your keywords on paper or even a metal plate:your portfolio becomes as tangible as a bar of gold!

#### Who's already using it?

10 % of people own 'crypto' and there are numerous communities

#### **Bank-exit.org**

**Business** directory

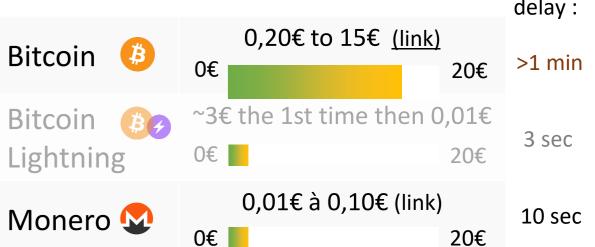

Beekeepers, farmers, doctors, bars, pancakes store restaurants ...

Bitcoin farm video

### What are the transaction fees?

Info delay:

## Can they be stolen?

No, if you follow the tuto below you become 100 % souvereign over your money!

Monero is untraceable, and payments are comparable to cash but are not handled by the ECB.

The US tax authorities are offering 625,000\$ to anyone who manages to crack any XMR address!

Monero (XMR): Pay and be paid **Bitcoin** (BTC): Value reserve/savings Comptabilité: bank-exit.org/compta

#### For bitcoin only:

#### > Swiss-Bitcoin-Pay.ch

With this Swiss service, your can choose the % of sales to be transferred in € to your account. But it's a private company, so potentially censurable.
